

OFFSHORE FIELD DEVELOPMENT SERVICES

One stop to get it done, and done right.

Our excellent track record of efficient, safe and compliant operations make us your one stop to get it done, and done right

Value-added platform development solutions for all your platform evaluation, relocation, and rehabilitation needs

Cotemar, a 100% Mexican company, has been providing logistics services in the Gulf of Mexico since 1979. Since 1998, we have offered efficient and seamless EPCIC* and MMO* solutions as part our wider value-added integrated E&P solutions.

To get the most from the opportunities presented by the Mexican energy market, companies will need local partners with relevant experience and infrastructure.

Our experience, knowledge, and specialized fleet will help deliver first oil in the safest and quickest way possible. Our extensive onshore infrastructure and international alliances support our wide portfolio of topside field development service, ranging from platform relocation and rehabilitation to construction, modification and decommissioning.

The wellbeing of our people and the environment is crucial to our business and we are committed to complying with the highest international industry standards, certifications, and regulations, including: ISM, DNV-GL, MARPOL, ISPS, ISO 9001:2015, ISO 14001:2015 and OSHA 18001:2007.

*EPCIC- engineering, procurement, construction, installation and commissioning

*MMO-maintenance, modification and operations

SERVICES:

- Platform evaluation studies
- Heavy lifting and platform relocation
- Platform rehabilitation, installation and commissioning
- Platform and module design, fabrication and modification
- Platform life extension
- Engineering, procurement and construction
- Quality assurance
- Decommissioning

Proven track record of improving the performance of platforms in the Gulf of Mexico

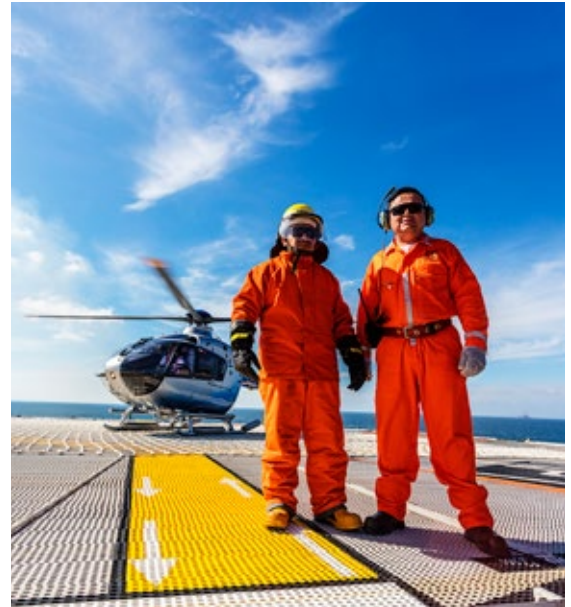

PLATFORM REHABILITATION SERVICES:

Evaluation: identify viable platforms by assessing platform condition with asset integrity studies and future MMO cost forecasting.

Relocation: heavy lifting and relocation backed up by EPCIC and MMO experience.

Modification: engineering, fabrication, installation, detailed design and commissioning.

Quality assurance: materials, structures, components, and systems.

Driven by a collaborative 'can do' culture, we aim to deliver quality for the people around us

PLATFORM LIFE EXTENSION SERVICES:

Asset integrity management: preventive and predictive inspection, repair and maintenance.

Fabric maintenance: non-destructive testing and corrosion management.

Module: design and installation of oil separators and, gas and water treatment plants.

Equipment: condition-based monitoring, maintenance, and installation.

Collaborative approach to optimize costs and a track record of delivering projects safely, efficiently, and on time

Having worked on some of the largest and most complex projects in the Gulf of Mexico, Abkatun and Akal-C in the Cantarell field, we have gained extensive experience, and knowledge of platform modification, rehabilitation, and life extension.

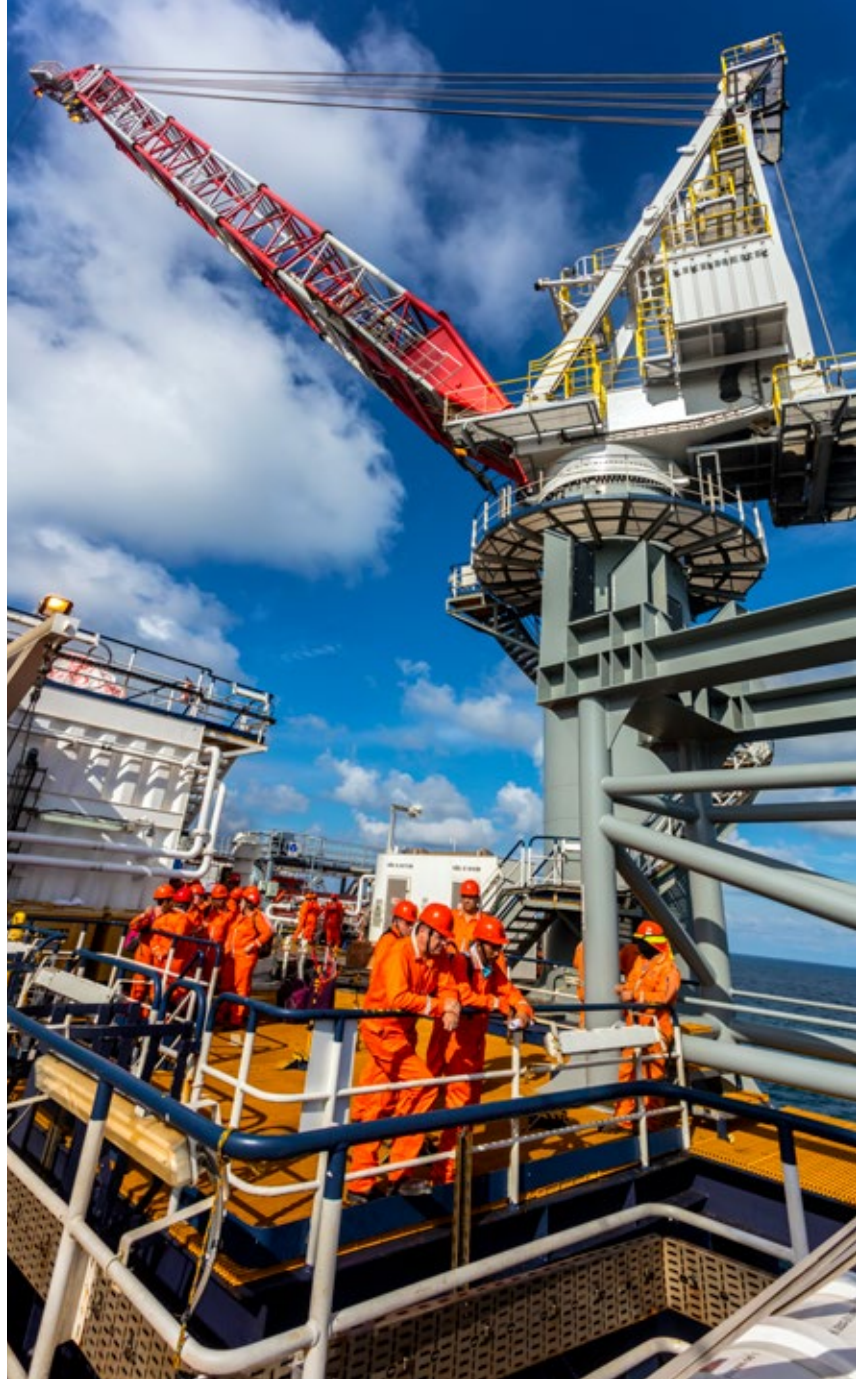

Our close interaction with local regulators, authorities, and suppliers greatly adds to our experience of how to deliver successful offshore projects in Mexico.

This means we can provide actionable intelligence to make informed decisions, beginning with the due diligence process through platform evaluation and asset integrity studies to optimize operations and mitigate safety risks.

Our topside services are backed up by our extensive local knowledge and alliances with leading technology and subsea companies, such as Aker Solutions and Worley Parsons.

Deliver first oil safely, quickly, and efficiently with our specialized fleet and integrated services State-of-the art SSPs: gain project efficiencies with our twin construction and SSP accommodations with: DP3, 2000m² deck for offshore storage and detailed design, walk to work gangway, 300-ton crane, and capacity for 750 POB.

Specialized vessels: highly capable, agile, and versatile construction and accommodations vessel with: DP2, 320m² deck, helipad and 100-ton crane, and capacity for 320 POB.

Strategically located onshore infrastructure with direct access to the Gulf of Mexico

Docks: independent supply, materials, and personnel docks with 300-ton crane and 72,000 feet assembly yard.

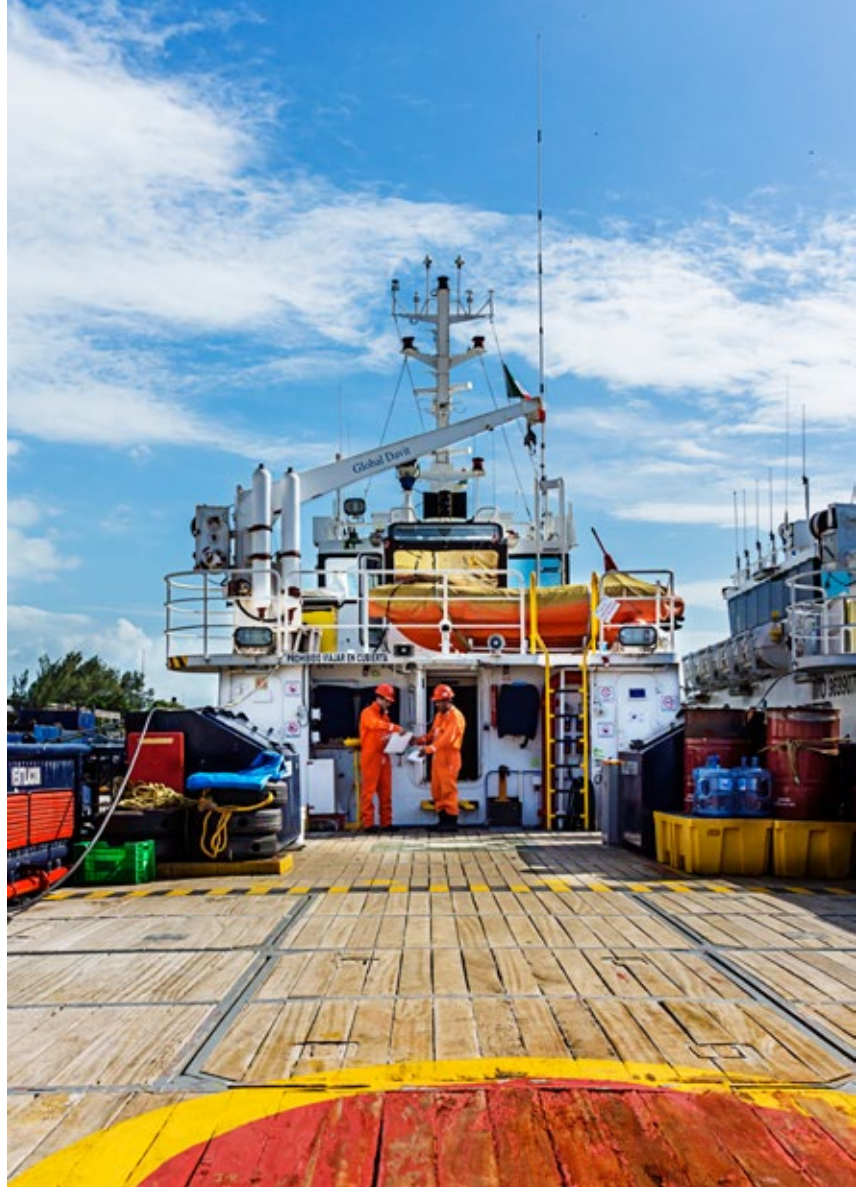

Dockside warehouses: covered storage.

28-acre construction yard: assembly, storage, cranes, and training facilities.

Airport: airport office and helicopter hangar.

*SSP-semi-submersible platform

*POB-people on board

VALUE-ADDED SERVICE DEFINED BY EXPERIENCE, EFFICIENCY, AND EXCELLENCE

- Sustainable local content through our long-standing supply chains, community development, infrastructure, and workforce retention and training programs.
- Optimize operational excellence through our seamless and integrated E&O services.
- Expedite your projects by benefiting from our local knowledge of documentation, regulators, marine authorities, and suppliers.
- Improve overall operational efficiency with our company-owned fleet of vessels, helicopters, and onshore infrastructure, which are maintained based on the highest standards with STAR IPS and AMOS software.
- Benefit from project time and save on costs with the DP3 capability vessels, helipad, walk to work gangway, ROV, storage, and assembly capabilities of our facilities and SSP accommodations and vessels.
