

Cotemar completes the Comprehensive Tank and Wellheads Interconnection Program for the Wells at the Quesqui and Tecominoacán Oilfields

April 15, 2021

Mexico City, Mexico.- **Cotemar** has announced that on March 24, it completed the work on the Comprehensive Interconnection Program of Tank FA-100B located in Quesqui 1, the Wellheads of the Quesqui 2, 3, and 4 wells, and the Installation of the Sour Gas and Vent Lines for the Tecominoacán Separation Battery.

The activities performed included the manufacturing and installation of the mix inlet line, the oil outlet line, the gas outlet line, and the vent line to interconnect the FA-100B three-phase separator tank.

“The work for the Comprehensive Interconnection Program was divided into strategic priorities, allowing us to complete it a few days before the agreed date with an outstanding performance. Since we consistently follow best practices and use highly qualified talent, we can optimize the performance of our customers' projects, beginning with logistics to complex projects,” said an internal source of **Cotemar**.

Activities performed:

Interconnection of the FA-100B tank at Quesqui 1 and the wellheads for Quesqui 2, 3, and 4.	Quesqui 1 interconnection of the three-phase separator tank	<ul style="list-style-type: none"> ● Manufacturing and installation of the mix inlet line ● Manufacturing and installation of the oil output line ● Manufacturing and installation of the gas output line ● Manufacturing and installation of the vent line
Tecominoacán separation battery	Manufacturing and installation of wellheads	<ul style="list-style-type: none"> ● Quesqui 2. ● Quesqui 3. ● Quesqui 4.
	Manufacture and installation of wellheads on the Tecominoacán separation battery	<ul style="list-style-type: none"> ● Sour gas ● Venting

Benefits:

The execution of this project will allow us to increase the production of additional volume of hydrocarbons by up to 47 Mbpd of oil and 175 MMcfd of sweet wet gas and ensure that we have the infrastructure required to achieve this

increase and that the transport capacity of the existing lines is used efficiently. This project will also allow us to incorporate the separated oil into the process at low pressure and the gas at high pressure, towards the displacement of the compressors of the Tecominoacán compression station.

With more than 40 years of experience, **Cotemar**, a 100% Mexican company, is committed to strengthening the oil industry and wellbeing of Mexico. As such, we perform our work under strict national and international quality and safety standards.
