

## Cotemar Receives Recognition from Pemex Exploración y Producción for its CNC Turnaround work on the Ku-S, Ku-M, and Zaap-C platforms

November 9, 2022

Mexico City, Mexico. After completing the work to comply with operating service requirements on time and with top quality and safety inside the facilities of CNC's nitrogen plant and the Zaap-C, Ku-S, and Ku-M Processing Centers, Pemex Exploración y Producción (PEP, Spanish acronym) recognized **Cotemar's** excellent performance, application, and commitment.

Also known as turnaround work, the purpose of this kind of maintenance is to provide operational continuity and ensure that the facilities, our personnel, and the environment are protected and safe. The work team for this project consisted of 431 workers and included the development of precast elements on land and tasks on board, which were performed from October 17 to 30, 2022.

"Turnaround work requires a significant amount of logistical planning and coordination to complete it in the established timeframe. The recognition awarded by PEP emphasizes that all activities were performed in strict compliance with the regulations with accident-free execution and efficient use of resources, to improve communication and reinforce physical security measures on the platform. This would not have been possible without the efforts and dedication of our highly qualified personnel," said an internal Cotemar source.

As a supplier for PEMEX for over 43 years, **Cotemar** is engaged in assuring that PEP's facilities function correctly by working with efficiency, delivery, and social empathy.
