

Lifting de Mexico adopts second school in Moloacán, Veracruz

August 28, 2023.

Mexico City, Mexico - Veracruz, Mexico - Ready for the return to school and as part of the "Adopt a School" program, Servicios de Extracción Petrolera Lifting de México carried out rehabilitation work at Marco Antonio Muñoz elementary school in the community of Tlacuilolapan, in the municipality of Moloacán, Veracruz.

This program seeks to promote and improve the quality of education in the region through the sponsorship of schools to address the lack of infrastructure, materials and equipment, promoting better academic and personal development of students.

In order to learn about the school's needs, meetings were held with school authorities and parents, which resulted in the rehabilitation of the classrooms, the construction of four access ramps for people with motor disabilities, as well as a concrete sidewalk in front of the classrooms. As a result, 147 children, 9 teachers and a principal, 122 parents and 7 workers employed by the community benefited.

This is the second educational institution to participate in this program in the municipality of Moloacán, the first being Lázaro Cárdenas del Río elementary school in Villa Cuichapa, which benefited 215 children, 10 academics, 175 parents and 12 workers in the region, by rehabilitating toilets, classrooms, administrative offices, sports fields, installing gates and metal protections, as well as restoring the perimeter wall.

Once again, social programs such as "Adopt a School" endorse Lifting de México's permanent commitment to the development of the communities in which we operate.
