

Day against Breast Cancer: Cotemar conducts more than 200 mammograms.

October 23rd, 2023.

Mexico City, Mexico. - On the occasion of the International Day to Fight Breast Cancer, which is commemorated every October 19th, Grupo Cotemar conducted a total of 210 mammograms for company employees, their families, as well as for the community of Ciudad del Carmen, Campeche.

In total, there were 140 studies for Cotemar collaborators and their families and 70 for women from Ciudad del Carmen, which were carried out with the team of the Breast Cancer Foundation A.C. (Fundación de Cáncer de Mama A.C., FUCAM), through the Women's Institute of Ciudad del Carmen (Instituto de la Mujer de Ciudad del Carmen, INMUCAR).

The mammograms for the women of Ciudad del Carmen were performed in a mobile unit equipped with state-of-the-art mammogram and specialized personnel who were at INMUCAR facilities on Friday, October 20th. On the other hand, the studies for collaborators and their families were carried out at Cotemar facilities with the same FUCAM mobile unit.

Likewise, on October 19th, Cotemar collaborators attended the talk "Preventing and Acting to Save Lives", to raise awareness about the prevention of breast cancer, given by Dr. Daniel Abelardo López Vallejo, oncological surgeon.

According to the World Health Organization (WHO), in 2020, 2.3 million women were diagnosed with breast cancer worldwide, and 685,000 died from the disease. At the end of the same year, 7.8 million women who had been diagnosed with breast cancer in the previous five years were still alive, making this cancer the most prevalent cancer in the world.

With this type of initiatives, Cotemar, in collaboration with FUCAM and INMUCAR, promotes actions for the prevention, detection, and diagnosis of this disease among its collaborators and women in the community.
